VP6D Dicie Isl –update

- It's been raining, we're waterlogged. In 24 hours we expect a significant storm to pass through, with heavy rainfall and up to 25 knot winds with potential for stronger gusts.
- We had some problems with the BGANs dropping off the satellite which is why DXA has occasionally not been updating in real time. We presume this is due to the WX and wet foliage. We moved both BGANs into the HQ tent, they seem to be performing better.
